

Please do not implement any proposal that would lessen Indiana's Telephone Privacy law protections. This Protection has greatly reduced the number of unsolicited and unwanted calls that I had been receiving on a daily basis. It was not unusual to come home to 5-10 messages on my machine every day. It had gotten so bad that I refused to answer the phone. Since the privacy laws have been implimented, that number has dropped to near zero. I feel that this is one of the best things that the state of Indiana has done to improve the quality of living in this state for quite some time.
